Drawing as Language: Celebrating the Work of Bob Steele Marni J. Binder 2017-05-10 Drawing as Language: Celebrating the Work of Bob Steele is a Festschrift in honour of Bob Steele, Professor Emeritus, artist, educator and tireless advocate for bringing authentic aesthetic lived experiences to young children. Bob Steele's prolific contribution to the field of visual arts education recognizes the importance of drawing for everyone, but especially with young children. As an artist-teacher-researcher Bob has devoted decades to developing understandings of drawing as language. He is a progressive thinker with commitment and passion, and through a lifetime of work has provoked serious engagement with children's drawing processes: how children learn through drawing, through authentic experiences with their sensory world, and through their intense engagement with stories. In this unique collection we have invited educators and scholars whose work represents the ongoing influence of the ideas and teachings of Bob Steele: what he has brought to the field of art education, early childhood studies, and curriculum studies in general. It traces the history and development of his ideas. The reader is taken through his journey as a young educator in rural Saskatchewan, Canada to significant moments in his teaching and his work. The voices of the contributors offer an insightful alternative into how drawing need not be limited to a particular discipline but can be language of communication; a language that significantly matters in the daily lives and learning not just only for children, but for those who also work with them. We hope this Festschrift inspires you to think about the drawings of children differently and take your understanding to a new level.

Leonardo da Vinci Walter Isaacson 2017-10-17 The #1 New York Times bestseller from Walter Isaacson brings Leonardo da Vinci to life in this exciting new biography that is "a study in creativity: how to define it, how to achieve it...Most important, it is a powerful story of an exhilarating mind and life" (The New Yorker). Based on thousands of pages from Leonardo da Vinci's astonishing notebooks and new discoveries about his life and work, Walter Isaacson "deftly reveals an intimate Leonardo" (San Francisco Chronicle) in a narrative that connects his art to his science. He shows how Leonardo's genius was based on skills we can improve in ourselves, such as passionate curiosity, careful observation, and an imagination so playful that it flirted with fantasy. He produced the two most famous paintings in history, The Last Supper and the Mona Lisa. With a passion that sometimes became obsessive, he pursued innovative studies of anatomy, fossils, birds, the heart, flying machines, botany, geology, and weaponry. He explored the math of optics, showed how light rays strike the cornea, and produced illusions of changing perspectives in The Last Supper. His ability to stand at the crossroads of the humanities and the sciences, made iconic by his drawing of Vitruvian Man, made him history's most creative genius. In the "luminous" (Daily Beast) Leonardo da Vinci, Isaacson describes how Leonardo's delight at combining diverse passions remains the ultimate recipe for creativity. So, too, does his ease at being a bit of a misfit: illegitimate, gay, vegetarian, left-handed, easily distracted, and at times heretical. His life should remind us of the importance to be imaginative and, like talented rebels in any era, to think different. Here, da Vinci "comes to life in all his remarkable brilliance and oddity in Walter Isaacson's ambitious new biography...a vigorous, insightful portrait" (The Washington Post).

Under Desert Skies Melissa L. Sevigny 2016-02-25 "The book tells the story of how an upstart planetary laboratory in Tucson, the Lunar and Planetary Laboratory (LPL), would help create the field of planetary science, breaking free from traditional astronomical techniques to embrace a wide range of disciplines necessary to study planets"--Provided by publisher.

Visible Learning John Hattie 2008-11-19 This unique and ground-breaking book is the result of 15 years research and syntheses over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

Circuit Down Larry Dimock 2007-07 Circuit Down is a guide for solving problems in the electrical circuits of a home - shorts, loose connections, GFCIs tripping, etc. The book is thorough but not overly technical, and gives over 30 helpful black and white diagrams and charts. Homeowners will come to understand their wiring system and what can happen to it. Many problems will become easy to fix with confidence.

The Undersea Network Nicole Starosielski 2015-02-25 In our "wireless" world it is easy to take the importance of the undersea cable systems for granted, but the stakes of their successful operation are huge, as they are responsible for carrying almost all transoceanic Internet traffic. In The Undersea Network Nicole Starosielski follows these cables from the ocean depths to their landing zones on the sandy beaches of the South Pacific, bringing them to the surface of media scholarship and making visible the materiality of the wired network. In doing so, she charts the cable network's cultural, historical, geographic and environmental dimensions. Starosielski argues that the environments the cables occupy are historical and political realms, where the network and the connections it enables are made possible by the deliberate negotiation and manipulation of technology, culture, politics and geography. Accompanying the book is an interactive digital mapping project, where readers can trace cable routes, view photographs and archival materials, and read stories about the island cable hubs.

Getting Textbooks to Every Child in Sub-Saharan Africa Birger Fredriksen 2015-05-22 Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process †" methods, copyright, length of print runs, effective procurement practices †" rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

Djibouti International Monetary Fund 2012-06-08 The modern economy of the Republic of Djibouti is based on rents directly or indirectly originating from the international port of Djibouti and from the country's strategic position. The Poverty Reduction Strategy Paper discusses that the growth recorded over the last five years is essentially driven by the increase in foreign direct investment—but especially by the activities of the Port of Djibouti. The informal economy constitutes a major proportion of the economic activities of Djibouti and provides a livelihood for much of the Djibouti population.

An Introduction to Evaluation Chris Fox 2016-10-18 Both practical and theoretical in approach, this book is the perfect companion for student researchers and policy makers alike. It provides actionable advice for planning and implementing evaluations, while also instilling an ability to assess the evaluations of others and consider the ways in which evaluation evidence could influence policy and practice. Drawing upon a wide range of examples from policy areas like education, criminal justice, and health and social care, this book showcases how evaluation is an interdisciplinary research practice with a spectrum of applications. Each chapter contains philosophical underpinnings and applied knowledge as well as examples from published evaluations. Specific topics include how to: Choose an approach to evaluation Plan, design, and conduct evaluations Approach evaluations using theories of change Differentiate between process, impact, and economic evaluations Understand the role of quantitative and qualitative methods in data collection Use systematic reviews and other tools to assess and disseminate evaluation findings From getting started in the field to turning evidence into policy, this book will guide you through every step of the evaluation process. *Preaching from the Old Testament* Walter Brueggemann 2019-05-07 In this new volume, prolific scholar Walter Brueggemann seeks to show Christian preachers how to consider the faith witnessed in several Old Testament traditions and to help them discover rich and suggestive connections to our contemporary faith challenges. The author also assumes that a wholesale sustained engagement with the Old Testament is worth the effort for the preacher. He recognizes what he calls the "sorry state" of Old Testament texts in the Revised Common Lectionary, which he claims often constitute a major disservice for the church and its preachers. The lectionary gerrymanders the Old Testament to make it serve other claims, most of the time not allowing it to have its own evangelical say. Brueggemann hopes that his exposition in this volume will evoke and energize fresh homiletical attention to the Old Testament, precisely because he believes the urgent work of the gospel in our society requires attentive listening to these ancient voices of bold insistent faith.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Learning Partnerships Marcia B. Baxter Magolda 2004 While a common goal of higher education is to improve student learning to prepare young adults for the professional, civic and personal challenges of their lives, few institutions have a model to facilitate these outcomes. ""Learning Partnerships"" offers a grounded theory and practical examples of how these objectives can be achieved at the college course, program, and institutional levels. The book takes as its foundation Marcia Baxter Magolda's Learning Partnerships Model - an empirically grounded yet flexible approach to promoting the learning goals of cognitive maturity, an integrated identity, mature relationships, and effective citizenship. The book then documents examples of actual practice and the learning outcomes they have yielded. The settings include community college and undergraduate courses, exchange and internship programs, residential life, a Masters' program, faculty development and student affairs organization.

The Go-Giver Bob Burg 2007-12-27 A new edition with expanded content is available now, "The Go-Giver, Expanded Edition: A Little Story About a Powerful Business Idea" An engaging book that brings new relevance to the old proverb "Give and you shall receive" The Go-Giver tells the story of an ambitious young man named Joe who yearns for success. Joe is a true go-getter, though sometimes he feels as if the harder and faster he works, the further away his goals seem to be. And so one day, desperate to land a key sale at the end of a bad quarter, he seeks advice from the enigmatic Pindar, a legendary consultant referred to by his many devotees simply as the Chairman. Over the next week, Pindar introduces Joe to a series of "go-givers:" a restaurateur, a CEO, a financial adviser, a real estate broker, and the "Connector," who brought them all together. Pindar's friends share with Joe the Five Laws of Stratospheric Success and teach him how to open himself up to the power of giving. Joe learns that changing his focus from getting to giving—putting others' interests first and continually adding value to their lives—ultimately leads to unexpected returns. Imparted with wit and grace, The Go-Giver is a heartwarming and inspiring tale that brings new relevance to the old proverb "Give and you shall receive." From the Hardcover edition.

The MBR Book Simon Judd 2006 The use of membranes is increasing throughout industry, and particularly

the water industry. The municipal water industry, which is concerned with the provision of clean drinking water to the population, is a big user and developer of membrane technology which helps it to provide water free of pathogens, chemicals, odours and unwanted tastes. Municipal authorities also have to process sewage and waste water, and membranes are used extensively in these processes. The MBR Book covers all important aspects of Membrane BioReactors in water and waste water treatment, from the fundamentals of the processes via design principles to MBR technologies. Industrial case studies help interpret actual results and give pointers for best practice. Useful appendices provide data on commercial membranes and international membrane organisations. * Major growth area in the water industries * Internationally-known author * Principles and practice, backed by case studies

The State of Social Safety Nets 2018 The World Bank 2018-03-23 The State of Social Safety Nets 2018 Report examines global trends in the social safety net/social assistance coverage, spending, and program performance based on the World Bank Atlas of Social Protection Indicators of Resilience and Equity (ASPIRE) updated database. The report documents the main social safety net programs that exist globally and their use to alleviate poverty and to build shared prosperity. The 2018 report expands on the 2015 edition, both in administrative and household survey data coverage. A distinct mark of this report is that, for the first time, it tells the story of what happens with SSN/SA programs spending and coverage over time, when the data allow us to do so. This 2018 edition also features two special themes: "Social Assistance and Ageing, focusing on the role of old-age social pensions, and Adaptive Social Protection, focusing on what makes SSN systems/programs adaptive to various shocks.
