Hijacking History Kathleen Wellman 2021-10-13 "This book insists that history matters. What if current divisions in America rest, in part, on a fundamental divergence in the understanding of our history? The book proposes the three most prominent Christian curricula have played a role through the historical narrative promoted for almost fifty years, becoming more widespread in different forms of alternative schooling from Christian schools to voucher programs, and homeschooling. Their narrative has been significant in defining Americans' understanding of the world and its history and exposes the efficacy of the alliance between certain religious interests, conservative legislators and school boards, and various corporate interests in reshaping education in the United States. The campaign for a "Christian right history" is analogous to the successful advocacy for "intelligent design" in public school science curricula. Many conservative institutions support both the inclusion of politically conservative and Christian content into school curricula"--

The Nature of the Religious Right Neall W. Pogue 2022-04-15 In The Nature of the Religious Right, Neall W. Pogue examines how white conservative evangelical Christians became a political force known for hostility toward environmental legislation. Before the 1990s, this group used ideas of nature to help construct the religious right movement while developing theologically based, eco-friendly philosophies that can be described as Christian environmental stewardship. On the twentieth anniversary of Earth Day in 1990, members of this conservative evangelical community tried to turn their eco-friendly philosophies into action. Yet this attempt was overwhelmed by a growing number in the leadership who made anti-environmentalism the accepted position through public ridicule, conspiracy theories, and cherry-picked science. Through analysis of rhetoric, political expediency, and theological imperatives, The Nature of the Religious Right explains how ideas of nature played a role in constructing the conservative evangelical political movement, why Christian environmental stewardship was supported by members of the community for so long, and why they turned against it so decidedly beginning in the 1990s.
