Enhancing Academic Research and Higher Education With Knowledge Management Principles Zyngier, Suzanne 2021-01-15 Knowledge management principles, strategies, models, tools, and techniques have been proven in government, business, and industry. More recently, knowledge management has emerged as an essential enabler for the successful pursuit of scholarly activities in higher education. Knowledge management has significant contributions to make in capturing, storing, processing, and disseminating knowledge between and across these stakeholder entities and their processes to better support these interrelated processes and activities. Given the impetus provided by the United Nations Global Knowledge Economy Policy, institutions worldwide are actively pursuing the use of knowledge management in all facets of social and economic development. The importance of knowledge management research and application in academia is a critical element of this multifaceted endeavor. Enhancing Academic Research and Higher

Education With Knowledge Management Principles is a compendium of cutting-edge research on the use of knowledge management in higher education and provides original, theoretical, and application-oriented research within this domain. The book will also provide insights on the management of expertise, knowledge, information, and organizational development in different types of work communities and environments. By including research on global perspectives, the implementation of knowledge management at universities, current trends in the field, and the results, this book is a valuable reference work for professionals and researchers working in the field of information and knowledge management in various disciplines, and academics, analysts, developers, students, technologists, education consultants, higher education administrators, academicians, stakeholders, and practitioners seeking to learn, improve, and expand their theoretical and applied knowledge of knowledge management tools and techniques, models, processes, and systems in higher education.

Includes: comprehensive program

profiles; international student admissions and fees; program recognition; support for international students.

Teaching Tourism Johan Edelheim
2022-02-28 Tourism as an activity is increasingly being criticised for its exploitative and extractive industrial approaches to business. Yet, it has the power to transform and to regenerate societies, cultures and the environment. The desire to explore the world around us is deeply embedded in many people's psyche, but it comes at a cost to the environment and often to the residents of the visited communities. Much of tourism education has been closely linked to preparing students for future professional practice, but the challenges and opportunities linked to its consumption require that its future leaders must exhibit very different values and understandings to tackle ever more complex and wicked problems from which tourism cannot dissociate itself. This teaching guide brings together a compilation of values-based learning experiences that can be adapted to suit the needs and disposition of individual instructors. It aims not only to engage students in the subject matter but also deepen their understanding of its complexity and interconnectivity and help them become global citizens that lead lives of consequence. Academics and practitioners in higher education institutions around the world in many different disciplines will find the thought-provoking conversation starters and activities of help in encouraging students to take a multi- or post-disciplinary approach to explore tourism from a values perspective. Consultants and academics engaging community stakeholders in capacity building will value its practical, accessible information.

Global Adaptations of Community College Infrastructure Gaulee, Uttam
2018-09-07 Community colleges in America have evolved a great deal from the establishment of the first community college in Chicago 117 years ago. The idea of American community colleges serves as a catalyst for connective solutions between industry, college, and the community on a global level. *Global Adaptations of Community College Infrastructure* provides emerging research on various contextual adaptations of the idea of the American community college as a connective solution to engaging community and industry. This research will help any nation or state forge policies on adapting the concept toward democratization of economic opportunities for all individuals as opposed to the current elitist system of higher education. Featuring coverage on a broad range of topics such as diploma pathway programs and the development of education institutions in various countries, this book is ideally designed for academicians, economic and educational policymakers, higher education professionals, and individuals engaged in expansion and democratization of post-secondary education worldwide.

Coaching Psychology: Meta-theoretical perspectives and applications in multicultural contexts Llewellyn E. van Zyl
2016-06-03 This book offers detailed strategies, methodologies, approaches, practice guidelines, and policy implications effective for professional coaching on the individual, group and organizational level. It details empirical research-based and theoretical perspectives on coaching psychology as well as elaborates upon the fundamentals within multi-cultural contexts. First

delivering a general introduction to coaching psychology before going on to examine specific psychological approaches towards coaching. The book also provides a conceptual framework for the use of psychometrics in multi-cultural coaching psychology. Next, the book presents meta-theoretical perspectives and applications for multi-cultural contexts, such as how to enhance leadership with group coaching from a system psychodynamic approach, how coaching can be used to support behavioral engagement and wellbeing, and how to utilize symbolic expressions, art, myths, dreams, and fantasies in coaching. This book provides practical tools towards critical self-reflective practice. Delivering the current state of the art research by presenting psychological coaching strategies theory and practice in one viewpoint. It also informs on the activity of various research approaches, thus interesting the broader student and academic reader. It will help all readers evaluate their current coaching competencies and, in the end, become better coaches. The book will also serve as an ideal resource for psychologists who want to migrate into coaching psychology.

The History of Geophysics in Southern Africa Johan de Beer 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century. However, its phenomena (like earthquakes, tsunamis, volcanic eruptions and lightning) had been objects of fear, curiosity and

speculation since ancient times. In this book, Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa.

Higher Education Financing in East and Southern Africa Pundy Pillay 2010

This nine-country study of higher education financing in Africa includes three East African states (Kenya, Tanzania and Uganda), five countries in southern Africa (Botswana, Lesotho, Mozambique, Namibia and South Africa), and an Indian Ocean island state (Mauritius). Higher Education Financing in East and Southern Africa explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing (including both household financing and the growth of private higher education institutions) and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. 'This unique collection of African-country case studies draws attention to the remaining challenges around the financing of higher education in Africa, but also identifies good practices, lessons and common themes.

Productivity Improvement in Manufacturing SMEs Thomas Thinandavha Munyai 2017-12-12 This book focuses on the application of workstudy in productivity of manufacturing SMEs locally and abroad and also explores

various industrial problems which face manufacturing SMEs in developing and underdeveloped countries in the rest of the world. Low productivity is currently a serious challenge facing manufacturing SMEs, where these SMEs are operating below expected production output levels which makes it difficult for them to compete in the global market. SMEs are the engine drivers of economic growth, one of which is manufacturing. The challenge is that government from various countries in developing and underdeveloped countries, mandated agencies in their respective areas, to ensure that there is economic progress for these SMEs, but productivity remains low in the manufacturing SMEs. When SMEs do not perform well, productivity of manufacturing SMEs declines and unemployment increases. Thus, an increase in unemployment results in a drop of GDP in the country and can become a global and economic crisis. This book describes a process which enables the reader to use effective knowledge that addresses problems facing the productivity of manufacturing SMEs such as work study tools and case studies and provides solutions and applications to improve the running of the manufacturing SMEs in growing their productivity.

Mining Latin America Institution of Mining and Metallurgy (Great Britain) 1994 Covers challenges to the mining industry with technical contributions on topics such as: investment, potential and evaluation; open-pit technology; mineral processing; solvent extraction; transportation, conveyor design and practice; environmental issues; and smelting and refining.
